OPERATING INSTRUCTIONS

SAFETY FEATURES:

SLEEP MODE:

Light enters sleep mode when off for 2 Minutes.
A quick double press will wake up the light.

LOCKOUT SWITCH FOR BOOST MODE:

Lockout switch must be switched to the unlock position for the press and hold boost mode feature to be engaged. The other modes will operate normally regardless of lockout switch.

CAUTION: Potential burn hazard.

Avoid contact with area with "HOT" symbol while in use.

HOW TO USE:

Press On/Off button to turn on.

Press 1 time for High.

Press 2 times for Medium.

Press 3 times for Low.

Press 4 times for Strobe.

Press and hold for Boost Mode

(ensure lockout switch is in the unlock position)

Next press off after 2 Seconds.

Light enters sleep mode when off for 2 minutes
and a quick double press will wake up the light.

HOW TO CHARGE:

Rechargeable battery is not user replaceable.

To charge use included USB cord and plug light into any USB charging port.

For best results turn the light off to charge.

If the light is on it will switch to low mode while charging.

BATTERY CHARGE INDICATOR:

Charging indicator lights are located near the Charging Port.

There are 4 blue lights to indicate the charge level based on how many are illuminated.

HOW TO CHARGE DEVICES:

Flashlight can be used to charge a cellphone or other portable devices.

Use the charging cord that came with your device and plug into the large USB port on the front of the light. For best device charging performance, do not use light while charging.
